m2m server software gmbh

Date: 30. October 2013

Press Release: SV & ESt Calculator
new Version 1.1.0

SV & ESt - social security and income tax calculator for self-employed people in Austria

The SV & ESt calculator is a mobil app for iPhone and iPad. It determines the maximum amount of social insurance and income tax for self-employed people in Austria for the current and the last seven years.

It calculates not only the profit derived from a given income but also the other way around which allows to determine how much one has to earn to reach a certain profit. The various functionality is activated by rotating the device.

The calculator allows to print the result, or to email it as PDF or CSV file for further use in spread sheet applications.

On the iPad version the position of the calculation sheet can be adjusted and the keyboard rotated for ergonomic convenience.

The new version adopts Apples new design and streamlines the layout of the app.

About m2m server software gmbh

The m2m server software gmbh – founded in 2003 – is an Austrian company specialized in server applications for SMEs. Since 2012 mobile applications for the iPhone and the iPad complement its portfolio.
